

Dear LabVIEW friend,

You're receiving this email either because you've signed up to the GDevCon ANZ newsletter, or you're an active user of LabVIEW in the Australian / New Zealand LabVIEW community. If you're not interested, please hit unsubscribe link at the bottom of this email.

GDevCon ANZ is running it's first conference this year, and it's creeping fast! It's happening in [Sydney](#), on October 24/25 2023. The GDevCon ANZ Inc team are putting in a big effort to make this event an awesome one for the Australian and New Zealand region LabVIEW community.

But to make this event a great success, we need your help:

1. **Be a presenter!** We have been receiving a number of really interesting presentations, but we need more! Have you got an interesting LabVIEW story to tell? Hearing about your project – your failures and successes can be some helpful for the audience. We encourage you to share it with the community and write up a [submission](#). Full session presenters attend for free!
2. **Be a sponsor!** We have already secured a number of sponsors (we will be revealing them very soon). But we need a handful more to make this a quality event. Sponsors get a range of benefits, and will be making a great contribution to the community. [Learn more, and fill in the form to apply.](#)
3. **Be an attendee!** Last but not least, come to the event! Come to connect, learn, experiment, engage, and socialise. You'll leave feeling energised to produce some awesome work, and be armed with information of how the best are going about their work, and what you can do to take advantage of your newfound knowledge! [Early bird tickets end 30 June 2023.](#)

We'd love it if you shared the word. Please share this newsletter with your colleagues and friends, and ask them to visit our website to [sign up to the newsletter](#) to stay in touch.

On behalf of the GDevCon ANZ team

Christopher Farmer

President GDevCon ANZ Inc
